

SMARTFOOTREST SURVEY RESULTS

January 8, 2023

Written by Yuichi Shikichi

We requested a survey of facilities that have been using Smartfootrest since early November 2022 between December 16, 2022 and January 8, 2023. The survey consisted of the following questions (1) to (5) on a 5-point scale of "no", "not so much", "undecided", "a little agree", and "completely agree", to be completed by the respondents themselves or by staff members.

Of the 11 facilities whose names could be disclosed, we received responses from the following 5 facilities (4 patients/users and 39 staff). The response rate was 45.5%. The results are described below.

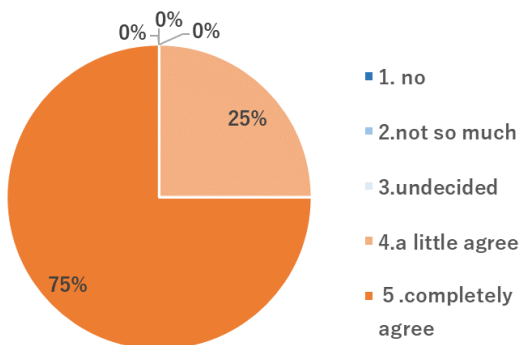

◆ Responding facilities: Chikamori Rehabilitation Hospital (2 patients, 19 staff), Atago Hospital (0 patients, 8 staff), Toda Central Rehabilitation Hospital (0 patients, 7 staff), Yuwa no Mori (0 users, 3 staff), Rehab Day Service Fit (2 users, 2 staff)

Smartfootrest Survey Results

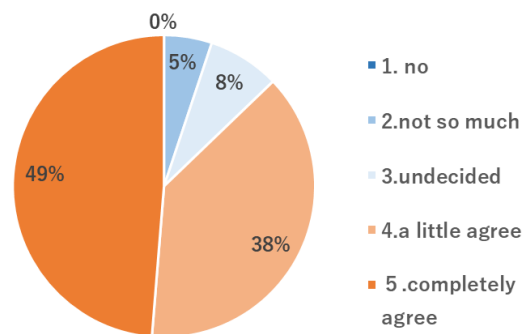

[questions]

● ① Would you like to continue to use Smartfootrest?

〈4 patients/users〉

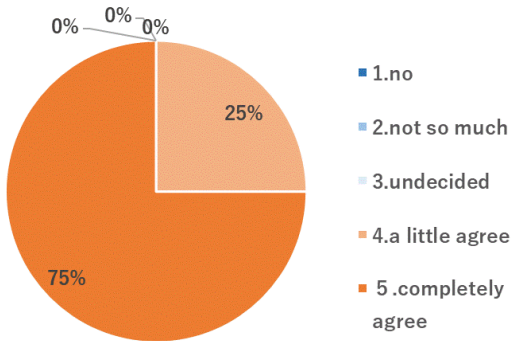

〈39 staff〉

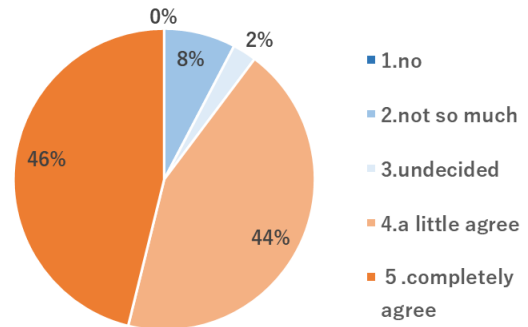

● ② Do you think Smartfootrests reduce the caregiver's burden of care?

<4 patients/users>

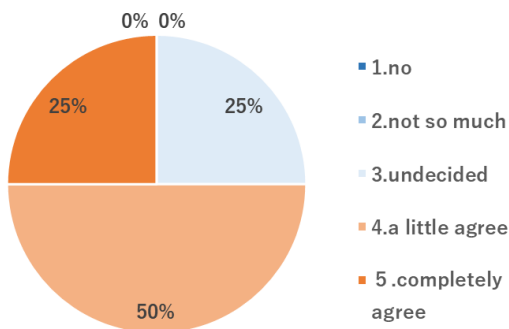

<39 staff>

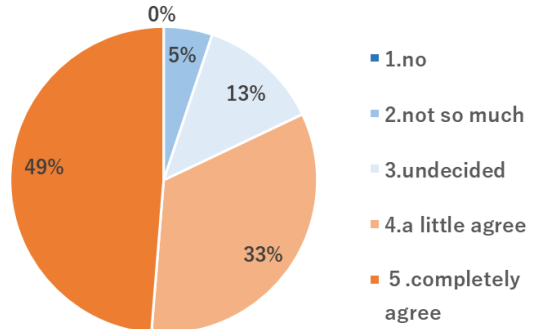

● ③ Do you think the use of Smartfootrests improves hygiene?

<4 patients/users>

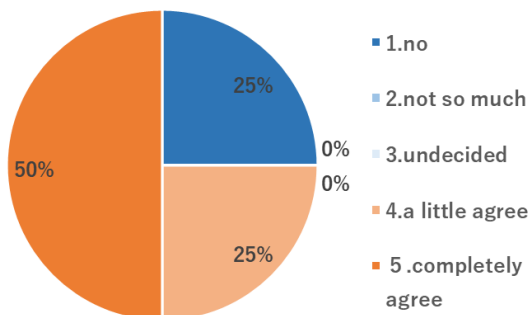

<39 staff>

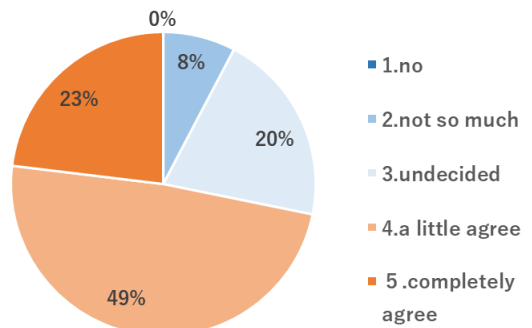

● ④ Do you think the use of Smartfootrests will reduce injuries due to contact in the same area caused by insufficient raising of the plate (insufficient closing operation) or falls due to snagging?

<4 patients/users>

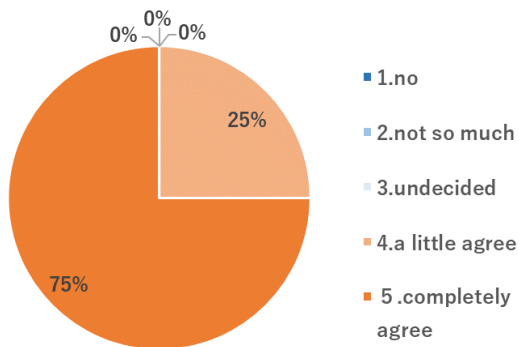

<39 staff>

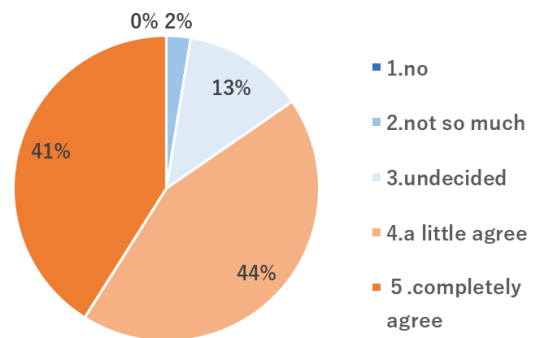

- ⑤ Do you think the Smartfootrest will make the lives of wheelchair users and caregivers more comfortable, safer, and more hygienic?

<4 patients/users>

<39 staff>

We thank the facility and its staff and patients for their cooperation.
